CORPORATE PRESENTATION Q2 2022

AUGUST 2022

SAFE HARBOR STATEMENT

This presentation has been prepared by GCC, S.A.B. de C.V. (together with its subsidiaries, “GCC”). Nothing in this presentation is intended to be taken by any person as investment advice, a recommendation to buy, hold or sell any security, or an offer to sell or a solicitation of offers to purchase any security.

Information related with the market and the competitive position of GCC was obtained from public sources that GCC believes to be reliable; however, GCC does not make any representation as to its accuracy, validity, timeliness or completeness. GCC is not responsible for errors and/or omissions with respect to the information contained herein. Due to rounding, numbers presented throughout this presentation may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures.

Forward Looking Statements

This presentation includes forward looking statements or information. These forward-looking statements may relate to GCC’s financial condition, results of operations, plans, objectives, future performance and business. All statements that are not clearly historical in nature are forward-looking, and the words “anticipate,” “believe,” “expect,” “estimate,” “intend,” “project” and similar expressions are generally intended to identify forward-looking statements. The information in this presentation, including but not limited to forward-looking statements, applies only as of the date of this presentation. GCC expressly disclaims any obligation or undertaking to update or revise the information, including any financial data and forward-looking statements, as well as those related to the impact of COVID-19 on our business, supliers, consumers, customers and employees; disruptions or inefficiencies in the supply chain, including any impact of COVID-19.

Any projections have been prepared based on GCC’s views as of the date of this presentation and include estimates and assumptions about future events which may prove to be incorrect or may change over time. The projections have been prepared for illustrative purposes only, and do not constitute a forecast. While the projections are based on assumptions that GCC believes are reasonable, they are subject to uncertainties, changes in economic, operational, political, legal or public health crises including COVID-19, and other circumstances and other risks, including, but not limited to, broad trends in business and finance, legislation affecting our securities, exchange rates, interest rates, inflation, foreign trade restrictions, and market conditions, which may cause the actual financial and other results to be materially different from the results expressed or implied by such projections.

EBITDA

We define EBITDA as consolidated net income after adding back or subtracting, as the case may be: (1) depreciation and amortization; (2) net financing expense; (3) other non-operating expenses; (4) taxes; and (5) share of earnings in associates. In managing our business, we rely on EBITDA as a means of assessing our operating performance. We believe that EBITDA enhances the understanding of our financial performance and our ability to satisfy principal and interest obligations with respect to our indebtedness as well as to fund capital expenditures and working capital requirements. We also believe EBITDA is a useful basis of comparing our results with those of other companies because it presents results of operations on a basis unaffected by capital structure and taxes. EBITDA, however, is not a measure of financial performance under IFRS or U.S. GAAP and should not be considered as an alternative to net income as a measure of operating performance or to cash flows from operating activities as a measure of liquidity. Our calculation of EBITDA may not be comparable to other companies’ calculation of similarly titled measures.

Currency translations / physical volumes

All monetary amounts in this presentation are expressed in U.S. Dollars ($ or US$). Currency translations from pesos into U.S. dollars use the average monthly exchange rates published by Banco de México.

These translations do not purport to reflect the actual exchange rates at which cross-currency transactions occurred or could have occurred.

The average exchange rates (Pesos per U.S. dollar) used for recent periods are:

Q2-22	-	20.0449	H1-22	-	20.2802
Q2-21	-	20.0416	H1-21	-	20.1843

Physical volumes are stated in metric tons (mt), millions of metric tons (mmt), cubic meters (m3), or millions of cubic meters (mm3).

U.S. INFRASTRUCTURE PLAN WILL BOOST THE CEMENT INDUSTRY

BIDEN INFRASTRUCTURE PLAN

- The Infrastructure Investment and Jobs Act is a $1.2 trillion infrastructure package. Included in the package is roughly $550 billion in new surface transportation spending. The plan will take 5-years and combines transformational efforts in roads, bridges, railroads, and domestic building, among others. All requiring cement
- 83% of GCCs EBITDA is driven by cement

MARKET

- Cement consumption is surpasing 2019 levels with expected growth in 2021
- Upcoming high cement demand will be boosted by the U.S. infrastructure plan

LIMITED AVAILABILITY

- Decrease of cement availability due to high demand and limited supply
- GCC is well positioned to meet U.S. demand with Mexico cement plants and a recently expanded U.S. plant

PRICE INCREASES

- In 2021, we increased cement prices twice, which represented an average of 8% increase
- 2021 cement price increase is greater than the cumulative inflation as of the end of September
- Market dynamic could potentially drive the increase in cement prices

CEO Q2 2022 QUOTE

Enrique Escalante, GCC's Chief Executive Officer, commented: *"GCC had a strong start to the 2022 construction season and delivered a solid first half of 2022. Our primary focus is to address unprecedented demand despite today's supply chain obstacles and ensure uninterrupted supply to our customers.*

GCC's vertical integration is an important competitive advantage to mitigate the effects of inflation. We remain vigilant of changes in the economic environment to improve our margins.

We are very pleased with GCC's second quarter results and expect the strong shipments to continue, as the underlying trends of GCC's business remain favorable."
